

Olympic Half Rack

The newest addition to our Olympic Power Line. Made from over sized 3" x 3" heavy wall square tubing with a 2" x 4" base, this Rack allows unrestricted pressing and squatting movements in an open front design. Adjustable bar racking assemblies allow for any bar take off height, and the adjustable locking safety bars allow you to lift with added safety. The bar resting and safety arms are lined with protective UHMW, eliminating any steel to steel contact between your Olympic Bar and the rack.

Additional featured include ergonomically angled chin-up handles providing natural exercise motion, and plate storage bars.

The standard height of this unit is 95", although it can be custom designed to virtually any height.

Specifications may be changed / upgraded, please check with your Pro Fitness Sales Representative for exact dimensions.

Price: \$1,100.00
