

## Seated Calf Raise w/ Plate Storage

This fully adjustable tilt-seat design enables greater stretch through the use of your own bodyweight. Large sealed pivot bearings and solid welded construction insure a strict movement throughout the life of the machine.

Included in this model is a stand up pre-stretch area which will allow the lifter to get a good stretch before and after the intense workout. Built in plate storage bars allow for quick and easy weight changes, and faster clean up after the workout.

Also included are convenient gripping handles and permanently attached UHMW wear guards which will keep the machine attractive for years.

Muscles Targeted: Soleus, Gastrocnemius
