

Angled Leg Press - Bolt Together

This Leg Press is the same as our model PF 311 with the added ability to break down into smaller sections which will enable you to maneuver down hallways, into basements and to set up in whatever areas in which you may have limited access. Once assembled, this machine offers the same rigidity and strength as our all-welded models.

Features include Ultra-Smooth Linear Bearings gliding on Case Hardened Shafting and our Extra Large multi-position Foot Plate. This unit also includes a fully adjustable back pad, angled head pad, and convenient gripping handles. Dual Lockout Positions are also standard.

Price: \$1,675.00
